

## LEVEL 2 MENTAL HEALTH ASESMENT

Student: \_\_\_\_\_ Age: \_\_ Grade: \_\_\_\_ School: \_\_\_\_\_

Mental Health Practitioner: \_\_\_\_\_ Date: \_\_\_\_\_

This tool is to be used during a Level 2 team threat assessment and in conjunction with other threat assessment protocols conducted by a school education lead and a school resource officer (or other law enforcement officer). It is to be used in the assessment, intervention, and supervision and management of threatening or dangerous circumstances involving students. It is not a prediction of future violence, nor is it a foolproof method of assessing an individual's short or long-term risk of harm to others. Since it is an examination of current circumstances (and as these circumstances change, so too does concern for aggression), please review the contents while being mindful of supervision, intervention, and the passage of time.

### Individual

Escalating  De-Escalating  Stable

1. Early behavior problems (<age10): \_\_\_\_\_
2. Risk taking: \_\_\_\_\_
3. Problems managing aggression: \_\_\_\_\_

### Family

Escalating  De-Escalating  Stable
