---

---

### Introduction

- 1933 Long Beach Earthquake
- The Field Act of 1933 established the Office of the State Architect – now the Division of the State Architect – which is charged with developing design standards, quality control procedures, and requires that all school buildings within the State of California be designed by registered architects or structural engineers.
- DSA provides plan review and construction oversight services to ensure that public school facilities meet minimum standards for structural safety, fire and life safety and access compliance
- DSA works with the Building Standards Commission on ongoing development of building codes and standards
- DSA has authority over Implementation of 2022 California Building Standards Code/Title 24

---

### Key Elements of Project Certification

- Initiation of Project Certification Phase by DSA Field Engineer
  - The project is occupied or in use
  - Construction activity has been suspended or abandoned for a period of one year
- Examination of the DSA Project File for Certification
  - Final Verified Reports
  - Post-Approval Construction Documents
  - Construction of Required Scope
  - Construction Compliance
  - DSA 168 Statement of Final Actual Project Costs serves as "Notice of Completion"
  - Reconcile Required Fees Paid to DSA
